

**DEVICE FOR SEALING FOOD PRODUCT CONTAINERS AND FOOD
PRODUCT CONTAINER PROVIDED WITH SUCH A DEVICE**

ABSTRACT OF THE DISCLOSURE

The invention relates to a device for sealing food product containers, in particular drink containers, comprising: a sealing element adapted to engage on a wall of a food product container around a wall opening arranged in the wall, and an operating element adapted to co-act with the sealing element for displacing the sealing element between an opened position leaving the wall opening clear and a closed position sealing the wall opening. The invention also relates to a food product container provided with such a device.
